

Shower transition trim

ADA compliant

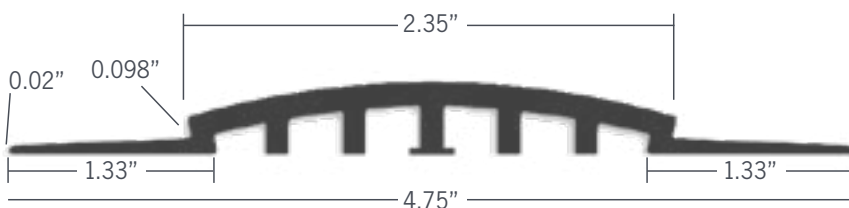

The protruding height of our shower transition trim is .12" when installed. ADA guidelines permit up to .25" in a roll-in shower.

ADA compliant showers must be a minimum of 60" x 30". When installing this trim please include it just outside of these dimensions to maintain compliancy.

This vinyl transition trim is designed to seamlessly heat weld into the flooring of wetrooms and shower areas in order to minimize water spread. The material is safe and comfortable underfoot and allows easy roll-over wheelchair access.

The shower transition trim works best with 2mm vinyl flooring. It may also be used to create an unobtrusive water barrier in places like kitchens or dish washing areas.

Please refer to our Shower transition trim installation instructions to ensure proper heat welding, fit and waterproof sealing in your wetroom.

Altro recommends Altro Aquarius flooring in wet environments.

Length	13' 4m
Overall width	4.75" 12cm
Visible width (after install)	2.35" 6cm
Overall height	.39" 10mm
Protruding height (after install)	.12" 3mm
Material composition	PVC
