Cleaning guide for rubber floors

Altro Ollero

Initial maintenance

When flooring installation is complete, and adhesive is fully cured:

- Sweep floor to remove any debris, then dust mop thoroughly to remove all surface dust and dirt using a dust mop or microfiber mop.
- Damp mop using AltroClean 44 Cleaner or AltroClean 48 cleaner/maintainer diluted with warm water using a microfiber mop (see dilution rates on label).
 - o Use a two-bucket system and change the water frequently.
 - o Do not use any oil base cleaners as they will deteriorate the mats.
- If floor has been unprotected during construction and an excessive amount of dirt or dust is present additional cleaning with an auto scrubber may be required.
 - o An RPM of 185 and brush pressure between 35 and 85lbs are recommended.
 - o If disc type equipment is used, be sure to use a soft nylon brush, not a pad.
- Do not flood floor.
- Allow to dry thoroughly.

General maintenance information

- Sweeping or vacuuming then damp mopping with a microfiber mop is the preferred method.
 - o Do not use a string mop
- Use a two-bucket system with AltroClean 44 Cleaner or AltroClean 48 cleaner/maintainer and change water frequently.
- Products containing solvents and acids will attack the composite structure of the rubber flooring and cause deterioration.
- Sealants, waxes, etc. can alter the surface characteristics and appearance.
 - o Altro does not assume any responsibility for damages caused by chemical additives.
- If a protective coating was used, be sure to reapply a coating after cleaning.

Floor treatment

- For most installation, it is not necessary to seal or coat Altro Ollero.
- In certain installations, a treatment may be appropriate.
- Mats with a predominance of light-colored EPDM will be easier to clean and maintain if treatment is applied.
- Contact your Altro representative for the correct choice in your application.
