

Installation techniques and detailing

Self-coved with cove former and captile strip C8 to wall tiles

For locations where a water-tight joint is required with wall tile. The Altro sheet flooring should be covered over a CF38R / CF20R radius cove former fixed at the junction of the wall and floor, up to a minimum height of 100mm and finished into Captile Strip C8, fixed by others in conjunction with the

wall tiles. The cove former and Altro sheet flooring used in this section must be adhered with a suitable contact adhesive. All mitres and joints within the coving must be hot welded.
