Altro elevates Doylestown Country Club's kitchen safety

Doylestown, Pennsylvania, USA

Established in 1916, Doylestown Country Club is a private country club located in Doylestown, Pennsylvania. In addition to its reputation as one of the top golfing destinations in the state, the Doylestown Country Club's culinary team strives to create memorable dining experiences for all members and guests. To achieve this goal, the country club has created a new space to elevate kitchen safety and ensure efficient back-of-house operations.

"The designers at Kimmel Bogrette Architecture + Site specified Altro Stronghold 30 due to its high slip resistance rating and its design that minimizes risks in wet and greasy conditions over the flooring's lifespan."

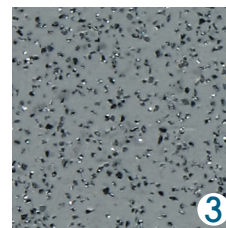

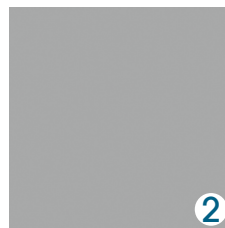

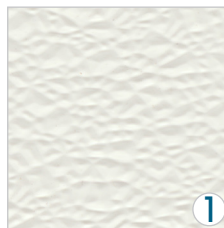

Another consideration was that Doylestown Country Club wanted a floor that would provide comfort for their staff, who spend prolonged periods on their feet. With 3mm thickness, Altro Stronghold 30 offers comfort underfoot and ample noise reduction.

Prior to installation, Altro's sales and technical team alongside Exceptional Flooring System Inc. and Kimmel Bogrette Architecture + Site carefully reviewed all the transition and drain details, ensuring that the flooring and clamping drains would be executed perfectly. This style of drain facilitates a watertight, seamless transition with the flooring. After walkthroughs were successfully completed, 350 square yards of Altro Stronghold 30 were installed.

With the installation of Altro Stronghold 30 in Doylestown Country Club's kitchen, the staff can now have peace of mind, knowing that the chance of slipping and underfoot fatigue is reduced.

Architect + Designer: Kimmel Bogrette Architecture + Site
